

UBC TRUNK LINE

A proper beer trunk line is an essential part of any long-draw draft beer system. It may seem a small and basic part of beverage equipment, but it impacts the reliability of the whole draft beer dispensing system.

FOIL WRAP

- Additional heat barrier

FOIL AND MOISTURE BARRIER WRAP

- Prevents condensation and increases cold transfer
- 3/4" Foam Insulation
- Creating airtight insulation around the tubing bundle

GLYCOL LINES

- Color coded supply and return

RUBBERIZED EXTRUDED JACKET

- Less likely for tears or punch holes
- Minimizes resistance during pulling
- Creating waterproof bundle

PE ULTRA PRODUCT LINES

- Ultra smooth inner service
- Reduction in formation of BioFlim
- Low adhesion of bacteria and east
- Color coded
- NSF51 and FDA approved

LINES

UBC COATED PYTHONS

Designed specifically to meet the combined performance requirements of durability, fire performance and flexibility.

- BS476 parts 7 & 6 Class 0 Coating
- Tough and durable protective jacket
- Suitable for demanding environments — excellent physical properties and mechanical strength
- Available in black or white colour finishes
- UV resistant option available

UBC COATED PYTHONS

- New ultra-smooth bore tube for ultimate in beverage tube performance
- Low adhesion of bacteria and yeast
- Reduced formation of "beer stone" to extend the cleaning cycle
- Color-coded beer lines for easier installation
