

Enjoy full draught flavour everywhere

draft2go[®]+ is an innovative, self-sufficient dispensing system with a stainless steel dispense head and an integrated CO₂ chamber inside the KEG. This sustainable, reusable container is the perfect solution for breweries and wine businesses planning to extend their range. **draft2go[®]+** will make it easier for them, as well as hospitality and catering businesses, to offer their guests a wide choice of beverages in premium quality – even in the smallest of spaces and completely independent of power and CO₂ supply.

Easy handling

The system uses the standard coupler range, covering all usual fitting types on the dispensing equipment market. The dispense head is easy to assemble and assemble, which means hygiene is guaranteed at all times. With the help of the compensator, the flow rate can be adjusted easily. The attached, external pressure reducer with non-return valve keeps the carbon dioxide content in the drink at the optimum level.

The highly efficient, stylish insulator jacket will keep the pre-chilled beer at drinking temperature for up to 8 hours – ideal for dispensing full draught flavour, wherever you want to.

Depending on the requirements, different stainless steel tap heads are available for the four fitting types: S-Type, D-Type fitting.

S-Type fitting

D-Type fitting

Technical Data

KEG	
Volume	10 l
Weight	approx. 5 kg
Height / external Ø	394 mm / 253 mm
Material, stainless steel liner	standard: mat. no. 1.4301, AISI 304
Top and bottom rings	polypropylene (PP), UV stabilised, can be recycled
PP colour	standard: black, other colours on request
Neck and fitting	flat fitting
Operating overpressure	max. 3 bar beverage chamber; max. 7 bar CO ₂ chamber
Test pressure	approx. 9 bar overpressure

Safety bursting point	25 ± 7 bar overpressure, both chambers have a safety bursting point
Numbering	standard, lasered
Coding (options)	datixPLUS character code / transponder (incorporated in the top or bottom ring in a tamper-proof manner) / barcode
Ecology	Reusable system, all parts can be recycled

draft2go[®]+ dispensing system

Weight of entire system	approx. 10,5 kg
Height / width / depth	600 mm / 360 mm / 480 mm
Insulator jacket material	EPP (expanded polypropylene)

Sustainable reusable KEG

Benefits

- Fresh draught flavour and perfect dispensing quality
- Food-safe, sustainable and reusable container guarantees perfect hygiene
- Highly efficient beer flow of up to 90 l / h possible
- Self-sufficient, environmentally friendly system, independent of power and CO₂ supply
- Consistently high beer quality for up to 28 days, so even residual contents remain in premium quality
- Icepack, insulator jacket, cooling pad and cooling bag can reduce the beverage temperature to 2.5 degrees in 3 hours
- Can be filled on existing filling equipment
